

Hydraulic Toe Jack

This hydraulic toe jack offers lifting capacities from 2.5 tons to 100 tons. It is designed for heavy-duty lifting in various industrial settings.

Product Overview

Professional Hydraulic Toe Jack

This hydraulic toe jack is engineered for lifting heavy machinery and equipment in confined spaces where standard jacks cannot reach. Featuring a dual-lifting design, it allows for heavy loads to be supported by both the head and the toe, offering versatility for various industrial maintenance and installation tasks. Constructed from durable low-carbon alloy steel with automatic welding, this tool ensures steady, superior performance for demanding professional applications.

Technical Specifications

Ideal Use Cases

- Narrow and small areas
- Heavy machinery lifting
- Equipment installation
- Industrial maintenance and repair

Material Composition

Low Carbon Alloy Steel

Manufacturing Method

Automatic Welding
