

Hydraulic Toe Jack for Machinery Lifting

This hydraulic toe jack is designed for lifting heavy machinery and equipment in confined spaces. It features both toe and head lifting points and spring-return for controlled lowering.

Product Overview

Industrial Hydraulic Toe Jack

This hydraulic toe jack is a versatile mechanical lifting tool designed for heavy-duty applications in factories and industrial environments. It enables the safe and efficient movement of heavy machinery, offering both toe and head lifting points for maximum flexibility. The robust steel construction ensures reliable performance for maintenance, repair, and equipment installation tasks.

Performance Metrics

Toe Lifting Capacity

10 Ton

Toe Capacity

Head Lifting Capacity

20 Ton

Head Capacity

Technical Specifications

Oil Capacity	0.32 L
Net Weight	28 kg

General Information

Alternative Names	Claw Jack, Lifting Up Jack, Toe Jack
Origin	Qingdao, Shandong, China
