

# I-Beam Clamp

This I-beam clamp is designed for secure attachment to structural steel members. Constructed from high-strength steel, it provides a reliable lifting point for various lifting equipment.

## Overview

### Professional Rigging Solution

The I-Beam Clamp is a robust rigging tool engineered for secure, temporary attachment to structural steel members. Constructed from high-strength alloy steel, it provides a reliable lifting point for hoists and cranes. Its adjustable design and threaded spindle mechanism allow for precise installation across various beam widths.

## Technical Details

Material	Alloy Steel
Adjustment Range	Wide adjustment range
Safety Features	Threaded Spindle, Locking Mechanism

## Applications

### Primary Applications

- Construction
- Manufacturing
- Maintenance
