Product Overview

High-Efficiency Refrigeration Compressor

This LBP (Low Back Pressure) compressor unit is engineered for reliable performance in small-scale refrigeration applications. Designed for optimal efficiency and quiet operation, it is an ideal solution for ice makers, wine coolers, and compact freezers. The unit utilizes R600a refrigerant and supports a standard 220-240V power supply, ensuring broad compatibility for professional refrigeration equipment.

Technical Specifications

Voltage	220V-240V
Frequency	50/60Hz
Refrigerant	R600a
Application Type	LBP (Low Back Pressure)

Features & Compatibility

Compatible Appliances

- Small Refrigerators
- Freezers
- Showcases
- Wine Coolers
- Ice Makers

Key Performance Features

High Efficiency, Reliable Operation, Low Noise, Low Vibration

Compliance

Safety Certifications

CE • CB
