

IEC C13 to NEMA 5-15P Power Cord

This is a standard IEC C13 to NEMA 5-15P power cord. It connects desktop computers, monitors, printers, and other electronic devices to a standard North American AC power outlet.

Product Overview

Reliable Connectivity for Electronic Devices

This IEC C13 to NEMA 5-15P power cord is an essential component for connecting desktop computers, monitors, printers, and various other electronic appliances to standard North American AC power outlets. Designed for durability and safety, it features a robust three-prong NEMA 5-15P plug on one end and a secure three-socket IEC C13 connector on the other. This cord is built to meet rigorous international safety standards, ensuring a stable and reliable power supply for your critical equipment.
