Product Overview

High-Performance Ignition Wire Set

This high-performance ignition wire set is engineered to deliver maximum spark energy to the spark plugs, ensuring reliable ignition and improved fuel efficiency. Designed with a durable silicone jacket for superior heat resistance and long-lasting performance, it features corrosion-resistant terminals for a secure, reliable connection. This kit provides a precise fit for specific vehicle models and includes all necessary wires for a complete, hassle-free installation.

Key Features

Service Offerings

Free Sample Available • Wholesale Pricing • Custom Color Box

Key Selling Points

100% Tested, Heat Resistant, Corrosion Resistant, Original Quality

Technical Specifications

Construction Materials

- Durable silicone jacket
- Corrosion-resistant terminals
- Low-resistance conductor

Reference Part Number

8818032-NCIL
