

Immersion Heater Element - Dual U-Shape, Threaded Base

This is an electric heater part suitable for water heaters and boilers. It features a dual U-shaped design and a threaded base for secure installation.

Overview

Dual U-Shape Immersion Heater Element

This high-performance immersion heater element features a robust dual U-shape design, engineered for optimal heat transfer in water heaters and boilers. Constructed from high-quality T2 copper with a durable nickel-plated surface, it ensures longevity and resistance to corrosion. Designed for versatile application, it supports multiple voltage standards and power outputs, making it a reliable solution for heating systems.

Technical Specifications

Output Power

2000 W

Minimum Power

4000 W

Maximum Power

Voltage Compatibility

- 220V-240V/50Hz
- 110V/60Hz

Sheath Diameter

8mm - 8.5mm

Material & Construction

Material

Copper (T2)

Surface Treatment

Nickel-plating

Compliance & Logistics

Certifications

CE

Packaging

1 PC per poly bag, 50 PCS per carton

Model Number

SAHE-3
