

Indented Hex Washer Head Self-Tapping Screw

This self-tapping screw features an indented hex washer head. It is designed for secure fastening in various materials with a sharp point for easy penetration and self-tapping threads for efficient installation.

Product Overview

Indented Hex Washer Head Self-Tapping Screw

This self-tapping screw features an indented hex washer head, engineered for secure fastening across a variety of material types. Designed with a sharp point for efficient penetration and specialized self-tapping threads, it ensures reliable installation and high holding power. It is an ideal component for demanding applications, particularly within the apparel and textile machinery sectors.

Technical Specifications

Head Style	Indented Hex Washer Head
Fastener Type	Self-Tapping Screw
Installation Features	Sharp Point, Self-Tapping Threads

Application

Primary Industry Applications

- Apparel Industry
- Textile Machinery

Identification

Model Identifier
NF-TP05
