

Indoor Carbon Fiber Radiant Heater with Timer

This electric heater provides radiant warmth for indoor environments. It features a carbon fiber heating element, adjustable tilt and oscillation, and a timer for controlled operation.

Product Overview

Efficient Indoor Heating Solution

This indoor carbon fiber radiant heater is designed to provide targeted, efficient warmth for personal or small-space environments. Featuring a robust circular heating element protected by a durable metal grill, it ensures safe and consistent heat distribution. With integrated timer functionality and adjustable heat settings, this unit offers a reliable and user-friendly solution for maintaining comfort in indoor settings.
