

Indoor HDTV Antenna

This indoor HDTV antenna is designed for terrestrial digital video broadcasting. It is compatible with HDTV signals and features a loop and extendable dipoles for optimal signal reception.

Product Overview

High-Performance Indoor HDTV Antenna

This indoor HDTV antenna is expertly engineered for terrestrial digital video broadcasting, ensuring clear and reliable signal reception. Featuring a versatile design with a loop and extendable dipoles, it is optimized to enhance digital TV signal quality in home environments. It is a robust solution for users seeking improved terrestrial broadcasting performance.

Technical Specifications

Design Features

- Loop antenna design
- Extendable dipoles for fine-tuning
- Optimized for digital video broadcasting

Model Number	HDA-02
Supported Signals	HDTV, DVB-T, DVB-H, Terrestrial

Compliance & Quality

Certifications

CE • RoHS • CQC • ISO 9001
