

Indoor Pan and Tilt IP Security Camera

This IP security camera is designed for indoor surveillance. It features pan and tilt functionality and can be remotely controlled via a smartphone or computer.

Product Overview

Smart Indoor Surveillance

This versatile indoor IP security camera offers comprehensive monitoring capabilities with its integrated pan and tilt functionality. Designed for home or office environments, it provides reliable surveillance for security, baby monitoring, or pet observation. Equipped with infrared LEDs, it ensures clear visibility even in low-light conditions, while its Wi-Fi connectivity enables seamless remote control via smartphone or computer.
