

Indoor Wall-Mounted Fan

This is a wall-mounted fan designed for indoor use. The fan has three blades designed for efficient air circulation.

Product Overview

Professional Indoor Air Circulation

This wall-mounted fan is engineered for efficient indoor air circulation in professional settings. Featuring a robust circular protective grill with radiating wire design, it prioritizes user safety without compromising airflow performance. The unit is equipped with three high-efficiency blades and an integrated control system for adjustable speed settings, making it a reliable solution for maintaining optimal air quality.

Technical Specifications

Mounting Type	Wall-mounted
Number of Blades	3
Control Mechanism	Rotary switch

Safety & Design

Grill Construction	Protective circular grid with radiating wires
Design Features	Wall-mounted, Space-saving, Decorative base
