

Industrial Abrasive and Grinding Machine

This industrial abrasive and grinding machine is designed for precision material processing. It features dual pneumatic clamping cylinders, a control panel, and a foot pedal for operation.

Overview

Industrial-Grade Precision Processing

This industrial abrasive and grinding machine is engineered for high-precision material processing in demanding manufacturing environments. Featuring a robust, stable frame construction, it ensures reliability and consistent performance during heavy-duty operations. The system is equipped with dual pneumatic clamping cylinders and an intuitive control panel, allowing for efficient and accurate workflow management.

Technical Specifications

Design Features

- Robust frame construction
- Industrial-grade durability
- Multi-function control panel
- Precision processing capability

Model Identifier	SJZ-355A
Clamping System	Dual pneumatic clamping cylinders
Operation Control	Foot pedal, Control panel, Pneumatic
