

Industrial Air Compressor

This compressor is designed for industrial applications, featuring a heavy-duty frame and powerful motor. It is equipped with safety features and a control panel for precise operation.

Product Overview

Industrial-Grade Performance

This industrial air compressor is a robust machine engineered for demanding manufacturing environments. Featuring a heavy-duty steel frame and a powerful motor, it provides a stable and reliable platform for various metal forming processes. Equipped with precise control systems and integrated safety features, it is built to withstand rigorous, continuous operation.

Technical Specifications

Model Number	JM31-250
Main Body Material	Steel

Key Features

Operational Highlights

- Heavy-duty frame construction
- High-power motor
- Integrated control panel
- Advanced safety systems

Suitable Applications	Metal Forming, Industrial Manufacturing, Heavy-Duty Operations
