

Industrial Air Compressor

This industrial air compressor is designed for continuous operation. Its robust design includes a control panel, emergency stop button, and ventilation grilles for efficient cooling.

Overview

Industrial Air Compressor

This industrial air compressor is engineered for continuous, heavy-duty operation in demanding environments. It features a robust design equipped with a centralized control panel and an integrated emergency stop button for enhanced safety. With optimized ventilation grilles, the unit ensures efficient cooling and reliable performance throughout long operational cycles.

Technical Specifications

Compliance

Euro Standard

Model Designation

LG55A

Key Operational Features

Continuous Operation, Emergency Stop, Industrial Grade, Integrated Cooling
