

Industrial Air Compressor for Heavy-Duty Applications

The JG75 is a robust industrial air compressor designed for demanding applications. It features durable construction, an advanced control system, and integrated safety features for reliable performance and consistent air delivery.

Product Overview

Robust Industrial Performance

The JG75 is a robust and efficient industrial air compressor designed for demanding applications. Featuring a durable construction and advanced control system, it provides reliable performance and consistent air delivery. Its compact design optimizes space utilization, while integrated safety features ensure secure operation, making it ideal for manufacturing, automotive, and heavy industrial environments.

Technical Specifications

Power Rating	22 KW
Model	JG75

Key Features

Operational Benefits

- Durable construction for heavy-duty use
- Advanced control system
- Compact design for space optimization
- Integrated safety features

Ideal Applications	Manufacturing, Automotive, Heavy Industry
--------------------	---
