

Industrial Air Compressor Unit

This heavy-duty air compressor unit is designed for industrial applications. It features a robust construction with a multi-cylinder configuration for efficient air compression.

Overview

Industrial-Grade Compression

This heavy-duty air compressor unit is engineered specifically for demanding industrial applications. Featuring a robust multi-cylinder configuration, it ensures efficient air compression and consistent performance. The unit is built for longevity, utilizing a cast iron cylinder block and head that provide superior durability and effective heat dissipation.

Technical Specifications

Key Design Features

- Heavy-duty industrial construction
- Multi-cylinder configuration
- Precision-engineered components
- Enhanced heat dissipation design

Model Identifier	JKS-003
Construction Materials	Cast Iron Cylinder Block, Cast Iron Cylinder Head

Applications

Suitable Applications

Pneumatic Systems • Compressed Air Applications • Industrial Manufacturing
