

Industrial Air Cooler Unit

This air cooler is available in ceiling-mounted, floor-mounted, and cross air blow ceiling-mounted configurations. It is suitable for use in cold storage, refrigeration systems, and various industrial cooling processes.

Overview

Industrial Air Cooler Unit

This industrial air cooler unit is engineered for high-performance cooling in cold storage and refrigeration systems. It offers versatile installation options, including ceiling-mounted, floor-mounted, and cross-air blow configurations to suit various facility layouts. Built with robust materials and high-efficiency fan technology, this unit ensures reliable thermal management and optimal airflow for demanding industrial cooling processes.

Installation & Configuration

Mounting Options

Ceiling Mounted, Floor Mounted, Cross Air Blow Ceiling Mounted

Technical Construction

Hairpin Tube Materials

- Steel
- Stainless Steel
- Copper
- Aluminum

Fin Materials

- Steel
- Stainless Steel
- Copper
- Aluminum

Fan Specifications

Available Fan Diameters

D050 • D071 • D091
