

Industrial Axial Ventilation Fan

This industrial axial fan is designed for efficient air movement. It features a robust metal housing with a circular duct connection and is equipped with four red blades and a centrally mounted electric motor.

Product Overview

High-Efficiency Industrial Ventilation

This industrial axial ventilation fan is engineered for robust air movement and effective exhaust applications in demanding industrial environments. Featuring a durable metal housing with a circular duct connection, it ensures reliable performance and consistent airflow. The unit is equipped with a high-performance electric motor and a four-blade design to maximize ventilation efficiency.

Technical Specifications

Number of Blades	4
Housing Material	Metal
Mounting Type	Circular Duct Connection

Application

Primary Applications	Industrial Ventilation, Exhaust Systems, Air Circulation
----------------------	--

Design Features

Key Features

- Robust metal housing construction
- High-efficiency axial blade design
- Centrally mounted electric motor
- Designed for industrial duty cycles
