

Industrial Bag Closing Sewing Machine

This high-speed industrial sewing machine is designed for closing filled bags. It utilizes a single-needle, two-thread chain stitch and features automatic lubrication for robust, continuous operation.

Overview

High-Performance Bag Closing Solution

This high-speed industrial sewing machine is engineered for the reliable closing of filled bags across various sectors, including agriculture, chemical, and food processing. It features a robust, durable construction designed for continuous, heavy-duty operation. With a single-needle, two-thread chain stitch mechanism and automatic lubrication, it ensures consistent performance and longevity in demanding industrial environments.

Technical Specifications

Lubrication

Automatic Lubrication

Stitch Type

Single-needle, two-thread chain stitch

Compatibility

Compatible Bag Materials

Paper, Burlap, Cotton, Plastic, Woven Polypropylene

Operational Features

Performance Highlights

1 pcs

Needle Count

2 pcs

Thread Count

Adjustable Settings

- Adjustable stitch length
- Adjustable sewing speed
