Product Overview

Industrial SIDE-LINE Filter Vessel

The SIDE-LINE series is a full-featured, investment-cast filter vessel designed for high-performance industrial filtration. Featuring a bead-blasted finish for easy cleaning and a versatile cover adaptable to various opening directions, this unit ensures both durability and maintenance efficiency. It is engineered to handle substantial flow rates and is available in high-grade stainless steel configurations to suit diverse chemical and process requirements.

Performance Metrics

Flow Capacity

20000 lt/hr
Size 01 Flow Rate

40000 lt/hr
Size 02 Flow Rate

Maximum Operating Pressure

10 bar

Technical Specifications

Seal Material

- Buna N (Standard)
- Viton (Optional)

Material Construction

304 Stainless Steel, 316 Stainless Steel

Connection Size

2" ANSI

Design Features

Compatible Filter Bag Sizes

Size 01 • Size 02

Optional Features

- Steam Jacket
