

Industrial Bottle Washing Machine

This industrial bottle washing machine is designed for high-volume cleaning. The machine utilizes a multi-stage washing process with stainless steel construction and automated bottle handling.

Overview

Industrial-Grade Cleaning Solution

This industrial bottle washing machine is engineered for high-volume, automated cleaning operations. Featuring a robust multi-stage process that includes pre-wash, wash, and rinse cycles, it ensures optimal hygiene standards for demanding production environments. Constructed from durable stainless steel, this unit is perfectly suited for the beverage, pharmaceutical, and food processing industries.

Technical Specifications

Washing Stages

- Pre-wash
- Wash
- Rinse

Industry Suitability

Beverage • Pharmaceutical • Food Processing

Material

Stainless Steel

Automation Features

Conveyor System, Automated Handling, Adjustable Parameters
