

Industrial Cartridge Filter Housing

The cartridge filter housing is designed for industrial filtration applications. Constructed from durable materials, it ensures reliable performance and longevity.

Overview

Industrial Filtration Solution

The LMX Series cartridge filter housing is engineered for demanding industrial filtration applications. Constructed from high-grade stainless steel, this unit ensures reliable performance and longevity in environments requiring high-quality fluid processing. It is designed to efficiently remove particulate matter and contaminants, making it an ideal choice for water treatment and chemical processing facilities.

Technical Specifications

Inlet / Outlet Connection

- 3/4 inch NPT (Standard)
- 1 inch NPT (Standard)
- Other sizes optional

Material of Construction	Stainless Steel 304, Stainless Steel 316L
Sealing Material	PTFE (Teflon)
Closure Mechanism	Bolt and Nut

Performance Metrics

Operating Pressure

1 Mpa

Maximum Pressure

0.7 Mpa

Continuous Operating Pressure

Finishing

Surface Finish Details

Surface Area	Finish Type
Outer	Polished or sand blast
Inner	Polished
