

Industrial Centrifugal Pump

This centrifugal pump is engineered for robust performance in various industrial applications. It is optimized for efficient fluid transfer, providing reliable and consistent flow rates.

Overview

Industrial Centrifugal Pump (Model RLFT6516-1602010)

This industrial centrifugal pump is engineered for robust performance and reliable fluid transfer across various demanding applications. Featuring precision-machined components and a high-efficiency motor, it is designed to minimize wear and reduce energy consumption. Its compact form factor ensures seamless integration into existing industrial systems, while rigorous testing guarantees consistent operational reliability.

Technical Details

Model Number	RLFT6516-1602010
Suitable Applications	Industrial Fluid Handling, Fluid Transfer, System Integration

Performance Features

Efficiency & Design

- High-efficiency motor for reduced energy consumption
- Precision-machined components for extended service life
- Compact design for easy installation
- Durable construction for demanding conditions
