

Industrial Centrifugal Pump

This centrifugal pump is designed for fluid transfer, boosting, and circulation. Its durable construction and robust motor ensure efficient operation and consistent flow rates.

Product Overview

High-Performance Industrial Centrifugal Pump

This industrial centrifugal pump is engineered for demanding fluid transfer, circulation, and pressure boosting applications. Constructed with high-quality stainless steel, it offers exceptional durability and resistance to corrosion in diverse industrial environments. The unit features a robust electric motor designed for consistent, energy-efficient operation, ensuring minimal downtime and reliable performance for clean water and non-aggressive fluid handling.

Technical Specifications

Material Construction	Stainless Steel
Suitable Fluids	Clean Water, Non-aggressive Fluids

Performance Features

Operational Highlights

1 Low

Maintenance Requirement

1 High

Corrosion Resistance

Applications

Primary Applications

- Fluid Transfer
- Pressure Boosting
- Circulation Systems
- Industrial Processing
