

Industrial Centrifugal Pump for Fluid Transfer

This centrifugal pump is engineered for effective fluid transfer in industrial settings. Its durable construction is suited for demanding conditions, and it features a direct-drive motor for reliable operation.

Product Overview

Industrial Centrifugal Pump

This robust centrifugal pump is engineered for efficient fluid transfer in a variety of industrial applications. Featuring a durable construction, it is designed to handle demanding operational conditions. The pump includes a motor for direct drive, ensuring reliable performance and easy installation for professional maintenance.

Technical Features

Key Design Features

- Durable construction
- Engineered for demanding conditions
- Easy installation
- Simplified maintenance

Drive Mechanism	Direct Drive
Application	Fluid Transfer, Industrial
