

Industrial Centrifugal Pump for Fluid Transfer

This centrifugal pump is designed for efficient fluid transfer. It is suitable for use in pipelines and processing plants.

Overview

Industrial Fluid Transfer Solution

This heavy-duty globe valve is engineered for precise flow regulation in demanding industrial environments. Featuring a robust body construction with secure flanged connections, it is designed for long-term reliability in critical infrastructure. It provides versatile control for water, oil, and gas systems, ensuring operational efficiency in processing plants and pipeline networks.

Technical Specifications

Operation Method	Manual handwheel
Connection Type	Flanged

Application

Ideal Use Cases

- Pipelines
- Processing plants
- Industrial flow regulation

Compatible Fluids	Water, Oil, Gas
