

Industrial Centrifugal Water Pump

Centrifugal water pump designed for industrial use. Features a stainless steel casing and impeller coupled with an electric motor.

Overview

Industrial Centrifugal Water Pump

This high-performance centrifugal water pump is engineered for demanding industrial environments requiring reliable liquid transfer. Built with a robust stainless steel casing and impeller, it ensures long-lasting durability and resistance to wear. Ideal for heavy-duty drainage and irrigation tasks, this unit offers a dependable solution for professional water management needs.

Technical Specifications

Suitable Applications

- Industrial Drainage
- Agricultural Irrigation
- Water Transfer

Construction Material

Stainless Steel Casing, Stainless Steel Impeller

Performance

Key Design Features

Industrial Grade • Sturdy Base Mounting • Electric Motor Driven
