

Industrial Chemical Mixing Equipment

Industrial chemical mixing equipment is designed for various applications. Features include a robust enclosure, control panel with indicator lights, and adjustable legs for stability.

Product Overview

Industrial Chemical Processing Solutions

This industrial chemical processing equipment is engineered for high-performance mixing, reaction, and storage applications. Featuring a robust, durable enclosure and an integrated control panel with intuitive indicator lights, it offers reliable operation in demanding environments. The unit includes adjustable legs to ensure stability and precise leveling on various facility surfaces.

Technical Specifications

Primary Applications

- Chemical Mixing
- Reaction Processes
- Chemical Storage

Model Identifiers

JET-800, PW-600

Design & Construction

Build Features

Robust Enclosure • Adjustable Stability Legs • Integrated Control Panel

Interface

Control panel with indicator lights
