

Industrial Circulation Fan

This circulation fan is constructed from stainless steel for durability and corrosion resistance. The fan blade is made from aluminum to ensure good quality and a long service life.

Product Overview

Industrial Circulation Fan

This high-performance circulation fan is engineered for industrial and commercial environments, offering significant airflow capacity for large spaces. It is an ideal solution for maintaining optimal temperatures and air quality in vegetable greenhouses, poultry houses, animal shelters, and warehouses. Designed with robust metal construction and aerodynamically optimized blades, it ensures efficient ventilation and long-lasting durability for demanding operational settings.

Key Features

Safety Features

- Protective safety grill to prevent accidental contact
- Robust metal construction

Ideal Applications

Greenhouses, Poultry Houses, Warehouses, Factories, Workshops

Technical Specifications

Mounting Configurations

Wall-mounted • Ceiling-mounted • Portable

Performance Metrics

1 High

Airflow Efficiency
