

Industrial Crushing and Culling Machine

This industrial crushing and culling machine is designed for material processing. It features a stainless steel hopper and discharge chute, supported by a robust frame with casters for mobility, and is equipped with an electric motor and control box.

Product Overview

Industrial Material Processing Solution

This industrial crushing and culling machine is engineered for efficient material handling and processing. It features a high-quality stainless steel hopper and discharge chute to ensure durability and hygiene during operation. The unit is mounted on a robust, mobile frame with casters, allowing for easy integration into various production environments.

Design & Construction

Mobility

Heavy-duty Casters • Portable Design

Construction Materials

Stainless Steel Hopper, Stainless Steel Discharge Chute, Blue-Painted Steel Frame

Technical Components

Power & Control

- Electric motor drive
- Integrated control box
- Manual operation interface

Applications

Intended Applications

- Material crushing
- Culling and sorting
- General material handling
- Industrial mixing (≠™:)
