

# Industrial Cutting Machine

This cutting machine is designed for industrial use. It delivers efficient and precise cutting for a variety of materials.

## Overview

### High-Performance Industrial Cutting Solution

This industrial cutting machine is engineered for precision, reliability, and high-volume output in demanding manufacturing environments. Designed with robust components and advanced control systems, it ensures clean, accurate cuts across a variety of materials. Its intuitive interface and durable construction make it an ideal asset for optimizing production efficiency and maintaining consistent quality standards.

## Technical Specifications

### Power Rating

**3.5 kW**

Motor Power

**220 V**

Voltage

### Max Cutting Speed

5000 mm/min

### Compatible Materials

Carbon Steel, Stainless Steel, Aluminum Alloy, Copper

## Operational Features

### Safety Certifications

CE Certified • ISO 9001 • RoHS Compliant

### Control System Features

- Real-time fault monitoring
- Automatic path optimization
- Emergency stop integration
- Touchscreen interface

## Dimensions and Weight

### Physical Dimensions

| Dimension | Value   |
|-----------|---------|
| Length    | 2500 mm |
| Width     | 1800 mm |
| Height    | 1500 mm |
