

Industrial Cutting Machine

This industrial cutting machine is designed for precise and efficient material processing. It features a robust frame, powerful motor, and a circular saw blade enclosed within a protective guard.

Overview

Industrial Precision Cutting

This industrial cutting machine is engineered for high-efficiency material processing in demanding manufacturing and fabrication environments. Featuring a robust frame construction and a powerful motor, it ensures stability and consistent performance during operation. The system includes an integrated circular saw blade with a protective guard and a user-friendly control panel for precise adjustments, making it an ideal solution for cutting metal, plastic, and various other industrial materials.

Technical Specifications

Model Identifier	LJD 350
Suitable Materials	Metal, Plastic

Safety & Design

Safety Features

- Protective blade guard
- Robust frame construction

Design Highlights

Industrial Grade • Precision Control
