

Industrial Diesel Engine CP110D1/D2

The CP110D1/D2 is a robust diesel engine for industrial and agricultural applications. Its high-speed operation ensures efficient power delivery and long-lasting performance.

Overview

Industrial Diesel Engine CP110D1/D2

The CP110D1/D2 is a robust and reliable diesel engine engineered for demanding industrial and agricultural applications. Designed for high-speed operation, it delivers efficient power output while maintaining a compact footprint for versatile installation. With a fuel-efficient combustion system and durable construction, this engine ensures consistent performance and longevity for heavy-duty equipment like generators and water pumps.

Key Features

Engine Highlights

High-Speed Operation, Fuel-Efficient, Compact Design, Easy Maintenance

Applications

Suitable Applications

- Power Generators
- Water Pumps
- Heavy-Duty Equipment

Technical Specifications

Model Designation

CP110D1/D2

Engine Type

Diesel
