

Industrial Diesel Power Generator

This industrial-grade diesel generator delivers reliable power generation. It features robust construction and an efficient cooling system for continuous operation in demanding environments.

Overview

Industrial-Grade Power Solution

This industrial-grade diesel generator is engineered for reliable, continuous power generation in the most demanding environments. Featuring a robust construction, it ensures durability and long-term performance for critical operations. The unit is equipped with an efficient cooling system to maintain optimal temperatures and incorporates advanced safety features alongside easy-access points for streamlined maintenance.

Key Features

Performance Highlights

240 kW

Rated Capacity

100 %

Duty Cycle

Core Attributes

Industrial Grade, Continuous Operation, Robust Construction, Safety Certified

Technical Specifications

Maintenance Features

- Easy access maintenance panels
- Integrated cooling system
- Safety-first design architecture
