Product Overview

Industrial Drying and Curing Oven

This industrial drying and curing oven is engineered for stable and consistent temperature control in demanding production environments. Constructed with a durable cold plate exterior and a 201 stainless steel interior, it ensures longevity and reliable performance. The unit features a high-efficiency circulating air system and robust thermal insulation, making it an ideal solution for various drying, curing, and heat treatment processes.

Physical Specifications

Structural Details

- 2.0mm cold plate bending and welding
- 50 x 50 square tube lifting bracket
- High-temperature thermal insulation material

Outer Dimensions

1800 x 1000 x 2010 mm

Materials

Cold Plate (Exterior), 201 Stainless Steel (Interior), Stainless Steel Perforated Mesh

Technical Performance

Key Performance Metrics

18 kW

Power Rating

1 HP

Circulation Motor

220 V

Voltage

Control Features

- Constant temperature circulating system
- Integrated timing setting system
- Electric control in duplicate
- Plug and play cable and plug
