

Industrial Drying Machine

This industrial drying machine is suitable for laboratory and manufacturing environments. It features a temperature control panel, a timer, and a secure door locking mechanism for the efficient drying of various materials.

Overview

Industrial Drying Machine

This industrial drying machine is engineered for precise thermal processing in laboratory and manufacturing environments. Featuring an integrated temperature control panel and a reliable timer system, it ensures consistent results for various materials. The unit is equipped with a secure door locking mechanism, prioritizing operator safety and process integrity during high-temperature operations.

Technical Specifications

Model Identifier	ZYH-18
Device Type	Electric Blast Drying Oven

Features

Key Features	Temperature Control, Timer Integrated, Secure Locking Mechanism, Industrial Grade
--------------	---

Application

Primary Applications

- Laboratory Research
- Industrial Manufacturing
- Material Drying
