

Industrial Electronic Instrument

This is an industrial electronic instrument with a control panel. It is designed for heavy-duty applications such as air filtration or material separation.

Product Overview

Industrial Performance Solutions

This industrial electronic instrument is engineered for demanding environments, featuring a robust enclosure and integrated control systems. Designed for heavy-duty applications such as air filtration and material separation, it ensures reliability and precise operational control. The system combines high-efficiency motor technology with durable construction to meet the rigorous requirements of commercial and industrial settings.

Technical Specifications

IP Rating

IP44

Voltage

220 V

Frequency

50 Hz

Rated Current

1.1 A

Power Output

0.25 HP

Rotational Speed

1400 R/MIN

Key Features

System Capabilities

- Integrated cyclone separator for particulate removal
- Robust thermal management with cooling fins
- High-efficiency ventilation motor
- Analog control panel for precise adjustments
- Durable galvanized steel housing

Performance Highlights

0.25 HP

Horsepower

1400 RPM

Speed

44 Class
