

Industrial Engine

This high-performance engine is designed for industrial applications. It features a robust construction and advanced combustion technology for optimal power output and fuel efficiency.

Overview

Industrial Engine TP-X

The TP-X industrial engine is engineered for high-performance applications, combining robust construction with advanced combustion technology. It is designed to deliver optimal power output while maintaining high fuel efficiency standards. Integrated with a durable cooling system and an electronic control unit, this engine ensures reliable operation and simplified maintenance for demanding industrial environments.

Technical Specifications

Application

Industrial

Model

TP1375X

Key Features

High-performance, Advanced Combustion, Electronic Control Unit, Durable Cooling System
