

Industrial Engine Turbocharger GTA5008 750058-5001S 239-9988

This turbocharger is designed for C15 industrial engine applications. It enhances engine performance by increasing air intake, which improves combustion and power output.

Product Overview

Industrial Performance Turbocharger

The GTA5008 turbocharger is a high-performance replacement component engineered for Caterpillar C15 industrial engines. Designed to increase air intake, it optimizes combustion efficiency to deliver significant power improvements in demanding heavy-duty environments. This unit serves as a robust direct replacement for various OE part numbers, ensuring seamless integration and consistent reliability for reclaimer mixers and industrial power systems.

Technical Specifications

Engine Displacement	15 L
Rated Power Output	505 kW
Maximum Torque	3207 Nm
Maximum RPM	1500 RPM

Compatibility

Machine Applications

- RM-500 Road Reclaimer
- TH35-C15I Transmission
- TH35-E81 Transmission

Compatible Engine Models	C15 Industrial Engine, C15 Petroleum Engine
--------------------------	---

Identification

Reference Part Numbers

750058-5001S • 239-9988 • 10R2301 • 284-2711 • 274-6295

Component Details

Key Internal Parts

Component	Part Number
CHRA	712371-0204
Bearing Housing	706666-0004
Turbine Wheel	451938-0001
Compressor Wheel	704746-0009
