

Industrial Engine

This engine is a robust and reliable power source designed for various industrial and machinery applications. Its durable construction and efficient combustion deliver consistent performance and longevity.

Overview

Industrial Engine Overview

This industrial engine features a direct injection combustion system and an efficient air cleaner, providing a low noise profile with high stability. Designed for versatility, it includes multi-choice PTO shafts and dual starting options, including both recoil and electric starters. Its compact structure makes it an ideal choice for diverse machinery applications requiring a reliable power source.

Performance Metrics

Featured Performance

6.7 hp

Max Power

5.5 hp

Continuous Power

305 cc

Displacement

Technical Specifications

Bore x Stroke	78x64 mm
Fuel Consumption	215 g/hp.h
Starting Methods	Recoil Starter, Electric Starter

Physical Dimensions

Weight Specifications

Type	Dry Weight
Recoil Model	36
Electric Model	41

Dimensions (LxWxH)	475x455x518 mm
