

Industrial Flanged Gate Valve

This gate valve is a flow control device for industrial applications. Constructed from durable materials, it features a flanged connection for secure installation in pipelines.

Product Overview

Industrial Gate Valve

The SABS664 Gate Valve is a robust and reliable flow control device engineered for demanding industrial environments. Designed for effective fluid regulation and isolation, this valve provides a tight shut-off to prevent leakage and maximize system efficiency. Its flanged connection ensures secure pipeline installation, while the design minimizes pressure drop during operation. Suitable for water, oil, and gas applications, this valve is built for longevity and ease of maintenance.

Technical Specifications

Key Performance Features

- Minimal pressure drop when fully open
- Tight shut-off capabilities
- Robust construction for longevity
- Easy maintenance design

Connection Type	Flanged
Compatible Media	Water, Oil, Gas
