

Industrial Fluid Transfer Pump

This pump is designed for various industrial applications requiring fluid transfer or circulation. Its robust construction ensures durability and reliable performance in demanding environments.

Product Overview

Industrial Fluid Transfer Pump QU-180D

The QU-180D is a robust industrial fluid transfer pump engineered for reliable performance in demanding machinery applications. Its compact design facilitates seamless integration into existing operational systems, ensuring efficiency in fluid transfer or circulation tasks. Built with durability in mind, this unit serves as a dependable component for various industrial workflows.

General Information

Model Number	QU-180D
Primary Applications	Fluid Transfer, Fluid Circulation, General Machinery
