

Industrial Gear Reducers for Conveyors

Industrial gear reducers designed for heavy-duty applications, suitable for screw type conveyors. The series includes the JZM 750A, JS 500A/750 reducer, and JZC 350 reducer.

Product Overview

Industrial Gear Reducers

These industrial gear reducers are precision-engineered for heavy-duty applications, specifically optimized for screw-type conveyor systems. The series offers versatile power options to meet varying operational demands, ensuring reliable torque transmission in industrial environments. Built for durability and performance, these units are essential components for efficient material handling and processing equipment.

Technical Specifications

Power Ratings

- 7.5 kW
- 11 kW
- 15 kW

Compatible Models

JZM 750A, JS 500A, JS 750, JZC 350

Primary Application

Screw Type Conveyors

Origin

Manufacturing Origin

Guangdong Province, China
