

Industrial High Pressure Air Blower

This high-pressure air blower is designed for industrial applications requiring efficient air circulation. The fan features robust construction and aerodynamically optimized blades for maximum airflow and pressure.

Product Overview

Industrial High-Pressure Air Blower

This industrial high-pressure air blower is engineered for demanding applications requiring efficient air circulation and ventilation. Designed with advanced technology, the unit operates with ultra-low noise levels while maintaining robust performance. It is compatible with global voltage standards and offers versatile power options, making it a reliable choice for factory and warehouse environments.

Performance Metrics

Power Range

90 W Minimum Power	25 kW Maximum Power
------------------------------	-------------------------------

Maximum Pressure	100 KPA
------------------	---------

Features & Capabilities

Key Features	Frequency Conversion, Anti-Corrosion, Ultra-low Mute, Advanced Technology
Compatibility	Global voltage standards
