

Industrial High-Velocity Drum Fan

This high-velocity drum fan is designed for industrial and commercial environments. It is constructed with a heavy-duty steel frame, aluminum fan blades, and a powerful motor for effective cooling and ventilation.

Overview

Industrial High-Velocity Performance

The HVB-42A is a high-velocity drum fan engineered specifically for demanding industrial and commercial environments. Built with a heavy-duty steel frame and durable powder-coated finish, it ensures long-lasting operation in warehouses, factories, and workshops. Its aluminum blades and powerful motor provide reliable, high-volume air circulation, while the integrated wheel system allows for easy portability across large workspaces.

Technical Specifications

Construction Materials	Heavy-duty Steel Frame, Aluminum Blades, Powder-coated Finish
Portability Features	Yes

Operational Capabilities

Key Performance Indicators

42 inches

Fan Size

Speed Settings	Multiple speed settings available for adjustable airflow
----------------	--

Application

Suitable Environments

- Warehouses
- Factories
- Workshops
- Large Commercial Spaces
