

Industrial High-Velocity Floor Fan

This high-velocity industrial floor fan is designed for optimal air circulation. It features a durable metal construction with a protective wire cage and adjustable tilt mechanism.

Product Overview

High-Velocity Air Circulation

This industrial high-velocity floor fan is engineered for robust air movement in demanding environments. Constructed with durable metal and a protective wire cage, it ensures safety and longevity during continuous operation. The unit features three balanced blades designed for maximum airflow efficiency and includes an adjustable tilt mechanism for precise directional control.

Technical Specifications

Number of Blades	3
Material	Durable Metal
Safety Features	Protective Wire Cage, Balanced Blades
Adjustable Tilt	Yes

Usage

Suitable Environments

- Industrial Facilities
- Commercial Spaces
- Residential Areas
