

Industrial Humidity Control Unit

This industrial unit both humidifies and dehumidifies. It is designed to maintain optimal humidity levels in large spaces such as manufacturing plants and warehouses.

Product Overview

Industrial Humidity Control Solution

This industrial humidity control unit is engineered for precision moisture management in large-scale environments. It features a robust, durable construction capable of handling demanding operational requirements in manufacturing plants and warehouses. With integrated automated control systems and external water supply capabilities, it provides reliable, consistent performance for critical humidity-sensitive applications.

Technical Specifications

Operational Capability	Humidification, Dehumidification
Control System	Automated

Design & Build

Water Management

- External water supply piping
- External drainage piping
- Large capacity tank

Construction	Robust industrial grade
--------------	-------------------------

Application

Ideal Environments

Manufacturing Plants • Warehouses • Industrial Facilities
