

Industrial Inline Fluid Transfer Pump

This industrial pump is designed for fluid transfer in various applications. It features a compact design with a motor mounted directly on top of the pump housing.

Overview

Industrial Inline Fluid Transfer Pump

This industrial inline fluid transfer pump is engineered for high-efficiency liquid handling in demanding environments. Featuring a compact, vertical inline design with a top-mounted motor, it saves valuable installation space while ensuring robust performance. Constructed from corrosion-resistant materials, these units are built to withstand rigorous operation, making them an ideal choice for reliable fluid transfer solutions.

Technical Specifications

Series

SL Series

Pump Configuration	Vertical Inline
Construction Material	Stainless Steel, Corrosion Resistant
Impeller Type	Closed Impeller
Casing Type	Volute Casing
