

Industrial LED High Bay Light

This LED high bay lighting fixture is designed for industrial and commercial applications requiring high-intensity illumination. It provides energy-efficient lighting with high lumen output and excellent light distribution.

Overview

Industrial High-Performance Lighting

This industrial LED high bay light is engineered for high-intensity illumination in large-scale environments such as warehouses, factories, and gymnasiums. It features advanced thermal management through integrated phase-change technology, which accelerates heat transmission for superior durability and consistent performance. The fixture combines an elegant, easy-to-install design with high lumen output and optimized light distribution to ensure efficient, glare-minimized lighting.

Performance & Technology

Heat Transmission Speed

50 x

Performance vs Aluminum

Thermal Technology

Phase Change Technology, Integrated Heat Sink, Non-contact Heat Resistance

Design & Installation

Key Design Attributes

- Elegant aesthetic
- Integrated thermal management
- Reflector included for glare reduction
- High heat sink utilization

Installation

Easy installation design
